

A large, modern chandelier is the central focus, featuring a gold-colored V-shaped frame from which numerous long, thin, white cylindrical tubes hang at varying lengths. The chandelier is suspended in a grand, dimly lit hall with high ceilings and classical architectural details. The floor is covered in a black and white checkered tile pattern. In the background, a doorway leads to a brighter area with a window. The overall atmosphere is sophisticated and contemporary.

EUROfase

DESIGN VISION

Creativity (***forward thinking***), originality (***individuality***), influence (***social and environmental***), and excellence (***quality***), are the key design values of Eurofase.

These concepts support a perspective that shapes and symbolizes the fusion of lifestyle, luxury, and timelessness.

KNOW YOUR OPTIONS

Before perusing the catalog, here are some helpful tips to assist you in selecting the appropriate light fixture that complements your lighting project.

TYPES OF LIGHTING

Chandelier

A chandelier is a decorative lighting fixture suspended from the ceiling, typically featuring multiple arms or branches with light bulbs or candle holders.

Vanity

A vanity light is a fixture designed for bathroom or dressing area use, typically installed above or around a mirror to provide focused and flattering illumination for personal grooming tasks.

Pendant

A pendant is a hanging light fixture that is suspended from the ceiling and typically consists of a single light source.

Wall Sconce

A wall mount light fixture is a lighting unit designed to be affixed to a wall, providing illumination in a particular area.

Flush Mount

A flush mount is a lighting fixture that is attached directly to the ceiling with no gap or extension, creating a close and flush appearance.

Outdoor

Outdoor lighting refers to fixtures designed for illumination in exterior spaces, such as gardens, pathways, patios, or building exteriors, to enhance visibility, safety, and aesthetics during nighttime.

IMPORTANT LIGHTING VOCABULARY

K9 Crystal

K9 Crystal glass offers superior quality and clarity, over typical clear glass. Additional lead-oxides or metal-oxides are added into the borosilicate glass to help retain its integrity when cut or blown. K9 produces brilliant light refraction when polished and beveled, specially through prismatic shapes. Its association with sophistication makes crystal desirable and higher in price than glass. The name is derived from the Italian term "Cristallo", which was used for high-end hand-blown glass in Murano, Italy.

Crystallic

It is a cast acrylic or high-quality polymer that offers superior optical clarity and excellent surface finishing. The base material used in CRYSTALLIC is PMMA, Type 1, IM30 grade cast acrylic. PMMA is widely used in consumer goods; not known to be toxic and is considered a safe material. Crystallic provides durability and is favorable for machining, making it ideal for applications requiring high transparency, lighting refractivity, and intricate details.

Crystal Pitch

It is a unique and proprietary design of multiple faceted gear shape pieces that surround a light source to emit a spectacular refraction in near exact form of polished crystal itself.

Shade

"Shade" refers to a covering or fixture that is used to control, direct, or modify the distribution of light from a light source. The choice of shade can significantly impact the quality and character of the lighting in a room.

Different types of shades can create varying effects, from cozy and warm to bright and focused. When selecting a shade for a lighting fixture, factors like the intended use of the light, the room's decor, and personal preferences should all be taken into account.

Delivered Lumens

"Delivered lumens" is a term used in the field of lighting design and engineering to describe the amount of actual usable light output that is delivered by a lighting fixture or system to a specific area or surface. It represents the quantity of visible light that reaches the target surface or space after accounting for various factors that can affect light transmission and distribution.

When specifying or evaluating lighting products, it's essential to consider delivered lumens to ensure that the lighting system meets the desired lighting levels and efficiency requirements for a given space or application.

ICON GUIDE

Dimmable

The illumination of the light can be increased or decreased with a dimmer switch. (sold separately)

Easy Installation

Product arrives pre-assembled, only requiring mounting to J-box and hardwiring.

Defogger

A demister device removes liquid droplets and leaves a designated area clear with heated pads to remove fog effortlessly.

Patent Pending

This item is in the process of receiving a patent, allowing us exclusive rights to this design.

Wet-Rated

A wet-rated fixture suitable for direct exposure to precipitation.

Correlated Color Temperature

CCT is the term used to reference the color of light.

Integrated LED

Incorporates LEDs directly into the fixture.

Damp-Rated

Designed and constructed to withstand exposure to moisture and damp conditions to some extent.

Touch Sensor Switch

A type of switch that allows you to control ON/OFF states as well as dimming options, through touch.

ECO Lightbulb

Compatible with ECO lightbulbs.

ORIGINS Collection

Line Extension

A product that is an addition to an existing Eurofase lighting family.

TRAITON

[TRAIT-TON]

The history of Czech glass reaches back to 8th century Bohemia and blossomed in the mid-1500s when glass beaded jewelry became a fashionable couture accessory. Subtle variations and differing sized baubles are now used in the arrangement of spherical elements found in Traiton to present a transitional aesthetic with aspects of contemporary frivolity.

THORAH

[THOR-AH]

The flare and élan displayed in the wielding of ni-tanbo sticks used in the martial arts can appear fluid and effortless. Perched atop these elegantly arranged, tapered sticks of Thorah are diffusers, sculpted to replicate newly unearthed precious gemstones. The combination of brawn and beauty lends dynamism to interior environments.

PHILLIMORE

[FILL-I-MORE]

Sophisticated charm exuberates from each of the ice glass orbs that hang from a champagne gold bar. Curved on one end, the gold band adds dimension and a unique quality to this fixture. The orbs asymmetrically placed still balance out the design by strategically placing more crystal-like globes opposite the bend.

MATERA

[MA-TEAR-A]

The Cliffside dwellings of Matera, Italy show signs of being inhabited since the Paleolithic era. Native to this southern Italian city is the Neapolitan Cyclamen. The budding flower and sinuous stem of this floral delight has been realized in cascades of luminous sprays that will add a timeless, playfully organic note to any receptive environment.

COCOLINA

[KOKO-LEENA]

Hand-cut, naturally colored glass in the Cocolina collection creates one-of-a-kind pieces. Because of its natural tinting process, the colors are not all exact, providing a range of smoke and amber hues which further adds to its uniqueness. With its intricate detailing of the hand-pressed glass, the light emits a captivating warmth from within.

PACET

[PA-GEY]

Handmade monochrome sugar glass ripples cascade in a mesmerizing pattern, creating unique art pieces with no two identical pieces. Each piece is piastra glass, which is hand-formed, pressed glass made from techniques that date to the 13th century.

BENICIO

[BEY-NIY-SIY-OW]

Its crystal rectangular prism and sharp beveled edges create brilliant illumination to the Benicio collection. Solid glass vertical spires cast vivid refractions across wall and ceiling surfaces. The thin simple geometric shape lends itself to luxurious and contemporary environments while providing a dual LED light source.

COBURG

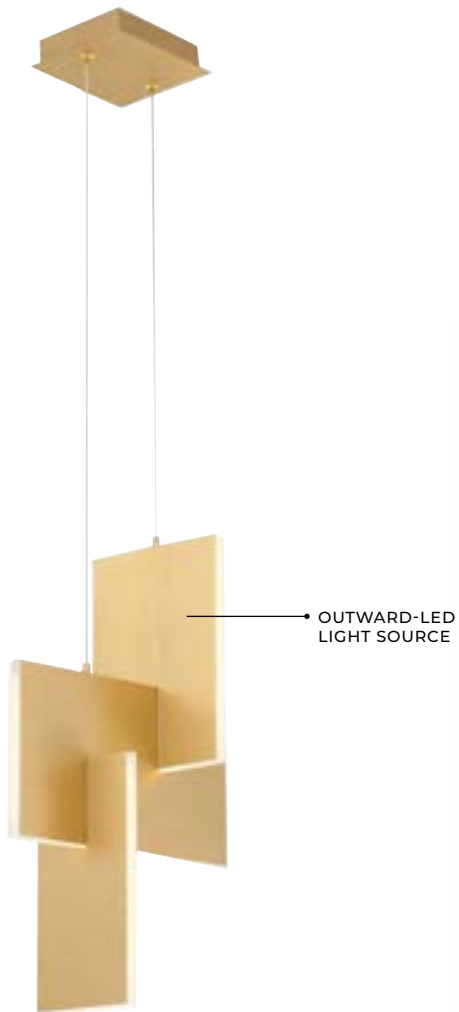

[KO-BERG]

Slim, edge-lit LED panels are creatively positioned to intersect in a dynamic, whimsically modern design. A continuous run of LED lights delivers seamless, multi-directional lighting. The interlocking aluminum panels are laser cut for added precision and anodized to create a durable, corrosion-resistant finish that's available in either gold, silver or black.

AERIE

[AIR-EE]

Free-flowing, gilded branches of gold and silver float elegantly within a stylish open cage constructed of cast brass and finished for the rigors of outdoor environments. The thin twigs are handcrafted with metal foil and accentuated by pinhole recessed LED lighting to add a luxurious glow to this nature-inspired collection.

ÉCROU

[EH-CREW]

Drawing inspiration from nature, the Écrou collection showcases large hand blown glass shades reminiscent of large acorns. The clear glass highlights a detailed wood grain texture that is combined with your choice of matte black, matte gold, or a mix of both finishes for a stately, stylized piece.

LACATTO

[LA-GAH-TOH]

Handmade metal shades feature a hammered surface for an organic dimpled texture. The uniquely curved upright is reflected into the underside of the dome, creating a soft diffused glow. Inspired by lily pads, this free flowing form provides a magically beautiful aesthetic that is enhanced as each head cascades down.

Custom lighting made just the way you want it. This low-voltage system creates a safe environment that reduces the risk of shock despite its exposed copper rail. After selecting your pendant, add your accessories based on functionality and style. A special hook design allows for easy attachment to hang modules on the inside or the outside of the ring. Add as many modules as you would like, up until 70 watts max.

TORCIA

[TOR-SHA]

BLACK | WHITE

Oil-based wick burners, once fueled by reservoirs, have been modernized with LED technology, providing illumination through a partially frosted candle tube and secondary down light source. This design compliments transitional and traditional interior settings.

ESPADADA

[UH-SPAA-DUH]

A salute to Raymond Loewy. Known as the 'Father of Industrial Design', the Espada collection pays tribute to modest design details from the 50's era. The "tail fin" end caps capture the unique and proprietary CRYSTAL PITCH™ LED lamping, refracting light through the center of the glass cylinder.

LAHAR

[LUH-HAAR]

Unused metal shipping drums are used in Caribbean art, turning yeoman-like materials into collectables. Lahar's textured metal creates a striking centerpiece for any eclectic space.

BALEIA

[BAL-EE-A]

Over a lifetime of wind and water abrasion, rocks become irregular, beautifully amorphous shapes with intriguing surface patterns. Those happenstances of Mother Nature serve as inspiration to this series of pendants, elevated by the addition of brilliant gold interiors that serve to warm and contrast the exterior.

LED MIRROR COLLECTION

WHY CHOOSE LED MIRRORS?

All our mirrors are designed and built to UL/ETL standards for North America, with the highest level of quality and reliability in mind.

- High quality, lead free, copper free corrosion resistant glass.
- Safety added Shatter proof adhesive backing mirror panes.
- Durable and damp-rated constructed frame, parts, and hardware.
- High efficacy LED chips, producing the most amount of Lumens, using the least amount of power.
- 90 or > Color Rendering Index.
- Convenient and safe wall mounting bracket design.
- Last Memory function (mirror will return to last function, when turned on/off from wall switch).
- Meets Title 24 requirements.
- Industry leading packaging/crate delivery program.

INTERGRADED TOUCH ACTIVATION SWITCH

All our LED mirrors include a Touch activated switch intergraded into the glass mirror itself. This switch is tastefully illuminated in a warm WHITE color allowing for subtle visibility. Here is a list of functions controlled by the Touch Activation Switch:

3-Step CCT Control

Tapping the CCT Touch button, it will cycle through 3 preset CCT's (3000k, 4500k, and 6500k).

Stepless CCT Control

Holding the CCT Touch button, it will tune through the full range of CCT's (3000k-6500k) allowing for a more specific display of colour temperature.

On/Off Power & Stepless Dimming

Tap the On/Off button to control power, or hold the On/Off button to tune up or down brightness levels.

On/Off Defogger

Tap the defogger button to control On/Off. All mirrors are equipped with a 1-hour shut-off function when accidentally left on.

CORRELATED COLOR TEMPERATURE

CCT defines the color appearance of a white LED. Color temperature is specified in Kelvin. Depending on its CCT, the light will either be classified as warm, neutral, or cool.

Light Classification	WARM	NEUTRAL	COOL
Ambiance	Areas that need low light intensity for a cozy, calm, inviting and intimate space	Light intensity applications for bright and vibrant mood	Special applications that need high light intensity and good color rendition for a crisp and invigorating space
Effects on Colors	-Enhances reds & oranges -Blues appear darker -Orange/yellow tint to whites and greens	-Enhances most colors equally -Does not favor yellow or blue -Neutral appearance	-Enhances blues -Flattens reds -Bluish tint to whites and green

VENYA

[VEN-YAH]

The Venya collection highlights a thick glass panel with a waterfall texture that is securely placed at the front and back of this rich black frame. Capturing the light within each crevasse, the integrated LED creates a 3D effect as the light grazes against the surface. The LED recessed within perfectly illuminates your space without any hot spots for a flawless brilliance.

KABO

[KA-BO]

Stylized smoke contrails have inspired music, art and movies. Now these streaming liquid particles suspended in the atmosphere have resulted in wide diffuser panels cupped by forward-facing plates that hide the LED light source to deliver linear rectangles of gauzy illumination.

[TIF-FIN-EE]

BLACK

The Tiffany collection features a truly unique surface highlighted by LED lighting. The black, wood grain glass displays beautiful ridges and slight notches that is juxtaposed against a simple black frame.

ANNETTE

(UH-NET)

BLACK

A flat rectangular panel extrudes from a backplate made of the same anodized metal for a seamless, unified look. The flat form, sitting vertically, creates a structural design that perfectly accentuates minimalist spaces.

WE CHOOSE INFRARED

EUROfase HEATING

Unlike other supplemental heating appliances, infrared heaters do not heat the air. Instead they emit a clean, safe wavelength of light that only warms the objects the wavelength touches. The physics involved is similar to the way sunlight warms objects, meaning there is a natural sensation of being warmed off the heat of an Eurofase Heating heater. For this reason, heat produced by infrared is evenly distributed, without interference from surrounding elements such as drafty or windy conditions.

AVAILABLE WATTAGES

1500W, 3000W, 4000W, 5000W, 6000W

COMPATIBLE VOLTAGES

120V, 208V, 240V, 277V, 480V

MOUNTING OPTIONS

Wall Mount, Ceiling Mount, Flush Mount, Pole Mount

COLOR OPTIONS

● Black ○ White ● Stainless Steel ● Any RAL color
