

**EUROfase**

# DESIGN VISION

At Eurofase, our design values are rooted in:

*creativity* | forward-thinking  
*originality* | individuality  
*influence* | social and environmental  
*excellence* | quality

These principles support a perspective that embodies the fusion of lifestyle, luxury, and timelessness.

# INTRODUCTION

Light does more than reveal a space. It sets a tone, creates anticipation, and shapes how we experience the materials around us. The 2026 Eurofase collection begins with this belief. Each piece is guided by the way light settles into stone, moves through glass, and reflects across metal, giving every surface its own sense of character.

This collection leans into texture and quiet detail. Travertine carries its natural variation with ease. Alabaster softens the atmosphere with a gentle glow. Hand-crafted glass responds to illumination with subtle shifts that feel almost alive. Paired with refined silhouettes and warm finishes, these materials create designs that feel composed, grounded, and unmistakably intentional.

Across the collection, light is approached as a sensory element rather than a technical one. It can anchor a room or fade into the background. It can highlight a single surface or bring an entire space into balance. Every design is shaped to work in harmony with its environment, allowing atmosphere and material to support one another with calm clarity.

We invite you to explore the 2026 collection and experience how each piece contributes to a space with its own quiet confidence. Notice the textures that come forward. Notice the warmth that settles across the room. Most of all, notice the feeling that remains. This sense of presence is what defines Eurofase and guides the collections we create.

# ICON GUIDE

## Lighting

### INTEGRATED LED

Incorporates LEDs directly into the fixture.

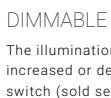

### WET-RATED

A wet-rated fixture suitable for direct exposure to precipitation.

### LINE EXTENSION

This product is an addition to an existing Eurofase lighting family.

### DIMMABLE

The illumination of the light can be increased or decreased with a dimmer switch (sold separately).

### EASY INSTALLATION

Product arrives pre-assembled, only requiring mounting to Junction Box (J-Box) and hardwiring.

### CORRELATED COLOR TEMPERATURE

CCT is a measurement used to reference the color of light.

### DAMP-RATED

Designed and constructed to withstand exposure to moisture and damp conditions.

### ADA COMPLIANT

This fixture is designed to meet ADA (Americans with Disabilities Act) standards.

# ATHENA

## Chandelier

Graceful arms extend outward like branches held in a moment of stillness, each ending in a softly glowing opal sphere. The composition feels suspended in motion, airy and balanced as light gathers across its form. Illumination is diffused with calm uniformity, allowing the sculptural structure to define the experience. Athena reads as a living presence in space, equal parts form, movement and quiet energy.

# RONDA

Grand Chandelier | Chandelier

Carved alabaster glows softly within elongated metal cylinders, creating a dialogue between warmth and structure. Each stone reveals subtle veining as light settles into its surface, giving every piece a quiet individuality. Varied suspension heights introduce relaxed vertical rhythm, allowing the composition to feel intentionally sculptural. Refined metal finishes frame the organic material with restraint, shaping light into a calm architectural statement.

# EMPRA

Grand Chandelier | Chandelier

Precision becomes poetry through a series of stepped aluminum rings wrapped in hand-placed crystal. As you move through the space, light shifts and sparkles in quiet motion, revealing new facets from every angle. A concealed internal glow animates the crystal from within, while layered diffusion beneath each tier introduces soft ambient balance. Empra brings depth, movement, and unmistakable presence to the room.

# CAMBRE

Grand Chandelier | Chandelier

Travertine is shaped into clean vertical cylinders where every pore and tonal shift becomes part of the design. Concealed illumination grazes the stone, revealing depth through texture rather than surface shine. A precise crystal element directs light downward, introducing a gentle halo that feels atmospheric. When grouped, Cambre creates a subtle cadence of stone and light that feels both organic and intentional.

# NEONESS

Grand Chandelier | Linear Chandelier

Illuminated lines become the architecture itself. Ribbed glass softens the light as it travels through clean geometric frames, introducing texture without weight. Square and linear compositions shift from quiet single statements to layered architectural installations. The balance of a crisp outline and diffused glow gives Neoness a presence that feels modern, intentional and quietly expressive.

# CARNAGIE

## Flush Mount

A glowing opal sphere is crowned by a ring of natural stone, creating a quiet tension between softness and weight. Subtle veining enriches the surface with organic depth, while refined metal detailing introduces balance and composure. The result feels timeless and grounded, offering warmth that is calm, confident, and enduring.
