

**EUROfase**

HOSPITALITY LOOKBOOK | 2026

# DESIGN VISION

At Eurofase, our design values are rooted in:

*creativity* | **forward-thinking**  
*originality* | **individuality**  
*influence* | **social and environmental**  
*excellence* | **quality**

These principles support a perspective that embodies the fusion of lifestyle, luxury, and timelessness.

# INTRODUCTION

Light does more than illuminate a space; it shapes how it is experienced. It sets the tone, creates a sense of welcome, and influences how every detail is perceived. Eurofase designs are created with this philosophy in mind, blending refined materials and thoughtful craftsmanship to bring spaces to life and draw people together.

Each fixture is designed to introduce depth, warmth, and balance. Natural stone adds organic texture and timeless character, while alabaster softens illumination with a gentle, inviting glow. Hand-crafted glass interacts beautifully with light, creating subtle movement and visual interest throughout a space. Paired with elegant silhouettes and sophisticated finishes, these elements contribute to interiors that feel elevated, comfortable, and intentionally composed.

Across the collection, lighting is treated as an integral part of the overall design, not simply a functional layer. It can create intimacy, add presence, or establish a sense of calm. Every piece is developed to work in harmony with architecture, materials, and interior finishes, resulting in spaces that feel cohesive and considered.

We invite you to explore and discover how thoughtful product design can transform a space with warmth, character, and lasting impression.

# ICON GUIDE

## Lighting

**INTEGRATED LED**  
Incorporates LEDs directly into the fixture.

**CORRELATED COLOR TEMPERATURE**  
Select and adjust the color temperature of the light, from warm to cool white

**DIMMABLE**  
The illumination of the light can be increased or decreased with a dimmer switch (sold separately).

**DAMP-RATED**  
Designed and constructed to withstand exposure to moisture and damp conditions.

**WET-RATED**  
A wet-rated fixture suitable for direct exposure to precipitation.

**ADA COMPLIANT**  
This fixture is designed to meet ADA (Americans with Disabilities Act) standards.

**LINE EXTENSION**  
This product is an addition to an existing Eurofase lighting family.

**EASY INSTALLATION**  
Product arrives pre-assembled, only requiring mounting to Junction Box (J-Box) and hardwiring.

## Mirrors

**INTEGRATED LED**  
Incorporates LEDs directly into the fixture.

**CORRELATED COLOR TEMPERATURE**  
Select and adjust the color temperature of the light, from warm to cool white

**DIMMABLE**  
The illumination of the light can be increased or decreased with a dimmer switch (sold separately).

**DEFOGGER**  
An integrated feature that will prevent fogging by heating the surface to keep it clear of condensation.

**DAMP-RATED**  
Designed and constructed to withstand exposure to moisture and damp conditions.

**WET-RATED**  
A wet-rated fixture suitable for direct exposure to precipitation.

**ADA COMPLIANT**  
This fixture is designed to meet ADA (Americans with Disabilities Act) standards.

**TOUCH CONTROLS**  
A type of control that allows the user to operate and select functions through touch.

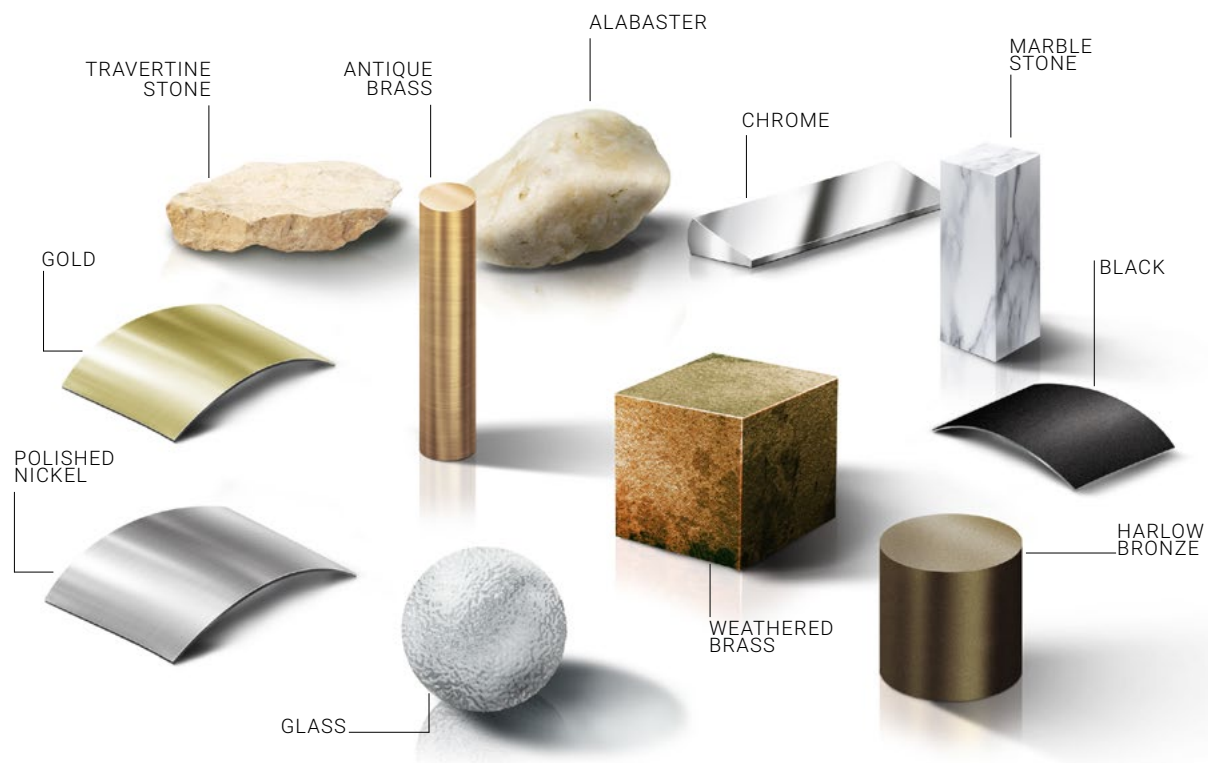

**HORIZONTAL / VERTICAL MOUNT**  
Mirrors can be mounted in portrait and landscape orientation.

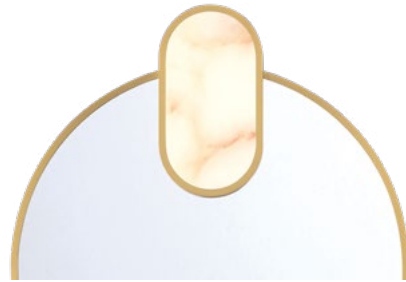

**EASY INSTALLATION**  
Product arrives pre-assembled, only requiring mounting to Junction Box (J-Box) and hardwiring.

# FINISH & MATERIAL GUIDE

# Thoughtfully Designed for Everyday Use

Every Eurofase LED mirror features touch-activated controls seamlessly integrated into the glass. Discreetly illuminated with a soft white glow, these controls provide convenient access to key lighting and comfort functions while preserving the mirror's clean, architectural appearance.

## Power & Dimming

Turn illumination on or off with a simple touch. Holding the control adjusts brightness levels, allowing users to create the ideal lighting environment, from bright task lighting to a softer, more relaxed ambiance.

## Defogger

Maintain a clear reflection in humid environments with the touch of a button. The integrated defogger helps reduce condensation on the mirror surface for added convenience and comfort. For increased efficiency, the defogger automatically shuts off after one hour of operation.

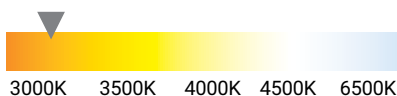

## Preset Color Temperature

Select from three preset lighting environments, 3000K, 4500K, and 6500K, to achieve the desired balance of warmth, clarity, and visual comfort.

## Custom Color Temperature

For greater personalization, users can fine-tune illumination across the full color temperature range of 3000K to 6500K by holding the CCT control, creating the ideal lighting experience for any setting or preference.

## WHY CHOOSE EUROFASE MIRRORS

- Designed and manufactured to meet UL/ETL standards for North America, ensuring exceptional quality, safety, and long-term reliability.
- Damp-rated construction ensures dependable performance in bathrooms and other moisture-prone environments.
- Shatter-resistant safety backing enhances durability and provides added peace of mind in commercial applications.
- Energy-conscious design supports modern building standards, including Title 24 compliance where applicable.
- Premium lead-free, copper-free mirror glass provides enhanced clarity while offering superior resistance to corrosion and edge deterioration.
- Designed for long-term performance using quality components selected for durability, reliability, and everyday use.
- High-efficiency LED technology delivers exceptional illumination while minimizing energy consumption and operating costs.
- 90+ CRI lighting accurately renders colors and skin tones, creating a more natural and flattering reflection.
- Integrated memory functionality recalls previous lighting settings, delivering a consistent user experience when powered from a wall switch.
- Engineered mounting systems simplify installation while providing secure, long-lasting wall attachment.
- Clean, contemporary designs complement a wide range of hospitality, multifamily, residential, and commercial interiors.
- Available in a variety of shapes, sizes, and illuminated configurations to support diverse design objectives and project requirements.
- Protective packaging and crating help ensure mirrors arrive in excellent condition, reducing the risk of damage during transit and project delivery.

# EMPRA

Precision takes form through stepped aluminum rings wrapped in hand-set crystal. Light emerges from within, activating each surface with subtle movement and controlled brilliance. Layered diffusion softens the composition, creating depth without excess. Empra introduces a refined sense of presence, balanced and composed.

\*Custom size upon request.  
Visit [eurofase.com](https://www.eurofase.com) to view the entire Empra Collection.

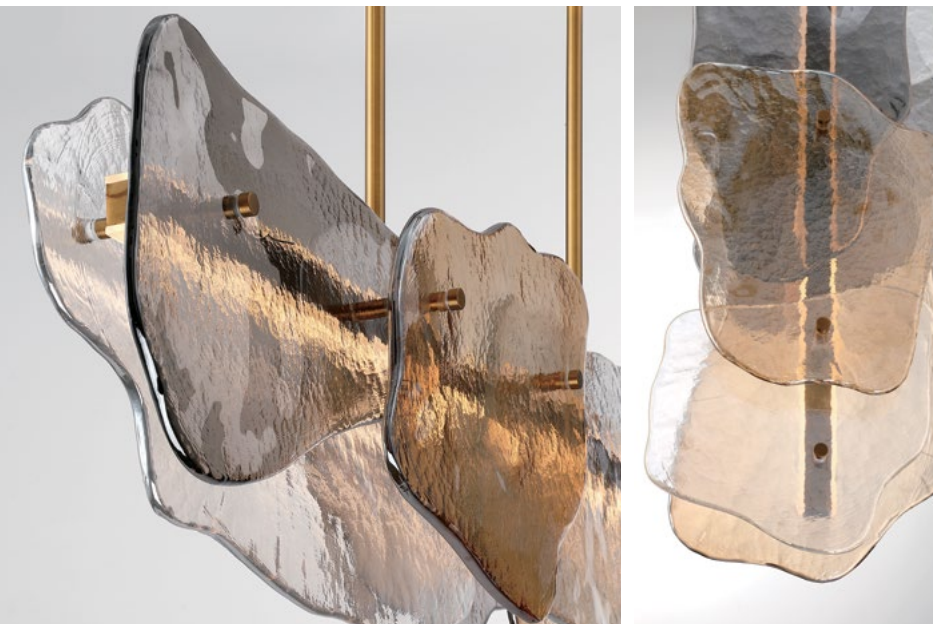

EMPRA GRAND CHANDELIER  
49350-012

# GROTTO

Glass is shaped with an irregular, sculptural profile, allowing illumination to travel unevenly through its surface. Variations in thickness and tone create contrast between brightness and shadow, giving the piece a raw, elemental quality.

Visit [eurofase.com](https://www.eurofase.com) to view the entire Grotto Collection.

GROTTO LINEAR CHANDELIER

50463-015

# NORAH

Freeform glass surrounds a core of quartz crystal, placing organic form in tension with precise structure. Light refracts and reflects through both materials, revealing variation in tone and intensity across clear, smoked, and amber finishes. The composition is layered and dimensional, with a sculptural quality that shifts as light moves through it.

\*Custom size upon request.  
Visit [eurofase.com](https://www.eurofase.com) to view the entire Norah Collection.

NORAH GRAND CHANDELIER

49238-020

# JATEO

Hand-formed glass is suspended in fluid composition, each piece shaped with organic variation. Illumination moves through the glass, revealing ripples and internal detail with quiet clarity. Structured metal framing provides contrast and restraint, allowing form and movement to coexist in balance.

\*Custom size upon request.  
Visit [eurofase.com](https://www.eurofase.com) to view the entire Jateo Collection.

JATEO GRAND CHANDELIER  
49920-024

# ALTESA

Layered ripple glass is arranged in a structured composition, where smoked, amber, and clear tones overlap to create depth and contrast. Light moves across each surface through reflection and refraction, revealing subtle variation in tone and intensity. The result is dimensional and composed, with a sculptural presence that defines the ceiling plane.

\*Custom size upon request.  
Visit [eurofase.com](https://eurofase.com) to view the entire Altesa Collection.

ALTESA FLUSH MOUNT  
50315-017

# DULTON

Layered artisan glass forms soft, organic contours that shift in tone and density. Metallic and neutral finishes overlap, allowing light to pass through in controlled gradients. The result is dimensional and grounded, with a sense of weight and quiet movement.

Visit [eurofase.com](https://eurofase.com) to view the entire Dulton Collection.

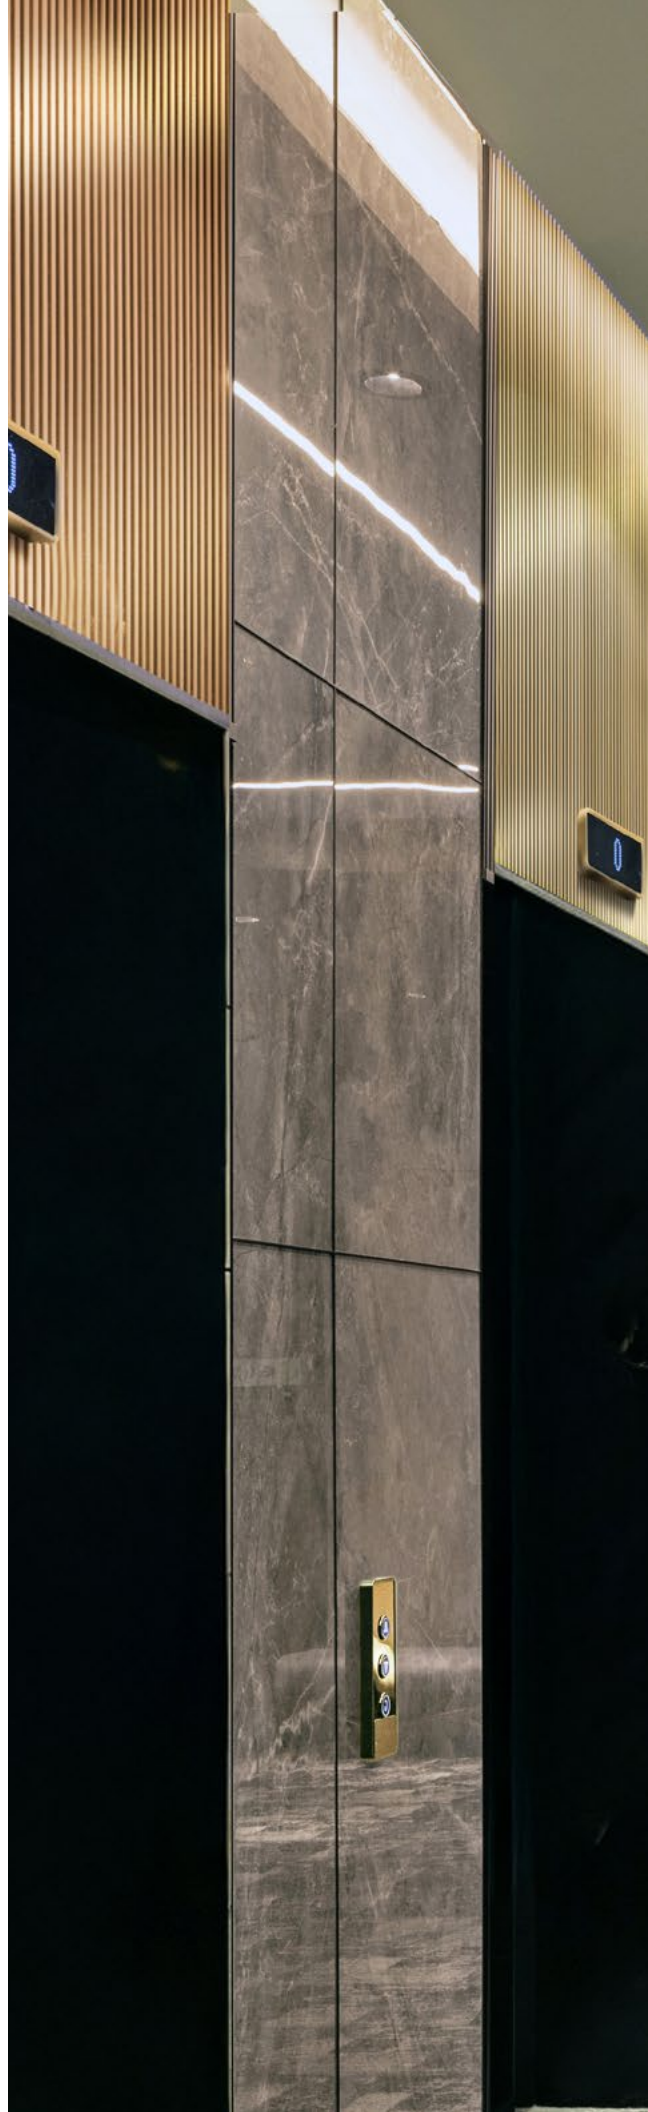

DULTON  
50118-014

# NOGA

A single alabaster plate rests within a slender steel frame, its natural veining shifting with the light and giving each fixture a character that is quietly unrepeatable. The form sits close to the ceiling, unassuming in profile, diffusing warmth through the stone in Gold and Black.

Visit [eurofase.com](https://www.eurofase.com) to view the entire Noga Collection.

# PARA

Acrylic and light are integrated into a precise, minimal form. Illumination is controlled and even, delivering clarity without distraction. Para is designed to integrate seamlessly into architectural environments where visibility and simplicity must coexist with refined execution.

67

PARA LED SIGNAGE  
30168-015

# LISSA

A single glass globe is defined by an internal light guide, focusing illumination into a precise vertical expression. Glass and light interact in quiet tension, shifting in tone from airy to intimate across clear, smoked, and amber finishes. lissa creates depth through simplicity and control.

Visit [eurofase.com](http://eurofase.com) to view the entire lissa Collection.

IISSA PENDANT  
50250-035

# GLASBURY

Ribbed cylindrical glass is paired within a structured metal frame, creating a composition that is ordered without being rigid. Light passes through the ribbed surface, softening as it diffuses outward in controlled gradients of tone and texture. The form is restrained and considered, with a quiet presence that reads equally well in transitional and contemporary interiors.

Visit [eurofase.com](http://eurofase.com) to view the entire Glasbury Collection.

GLASBURY WALL SCONCE  
47241-015

# VENNA

Elongated alabaster reveals natural veining as it diffuses light from within. Slender metal elements introduce structure with restraint, establishing a vertical rhythm that is calm and deliberate. The balance of organic material and refined form creates a composed, architectural presence.

# MRISSA

Natural alabaster diffuses light from within, revealing veining and variation that belong entirely to the material. An indirect LED halo makes visible what daylight only suggests. The pill silhouette is composed and unhurried, and because the material is natural, no two mirrors are the same.

Visit [eurofase.com](https://www.eurofase.com) to view the entire Venna and Mirissa Collections.

VENNA PENDANT  
50352-029

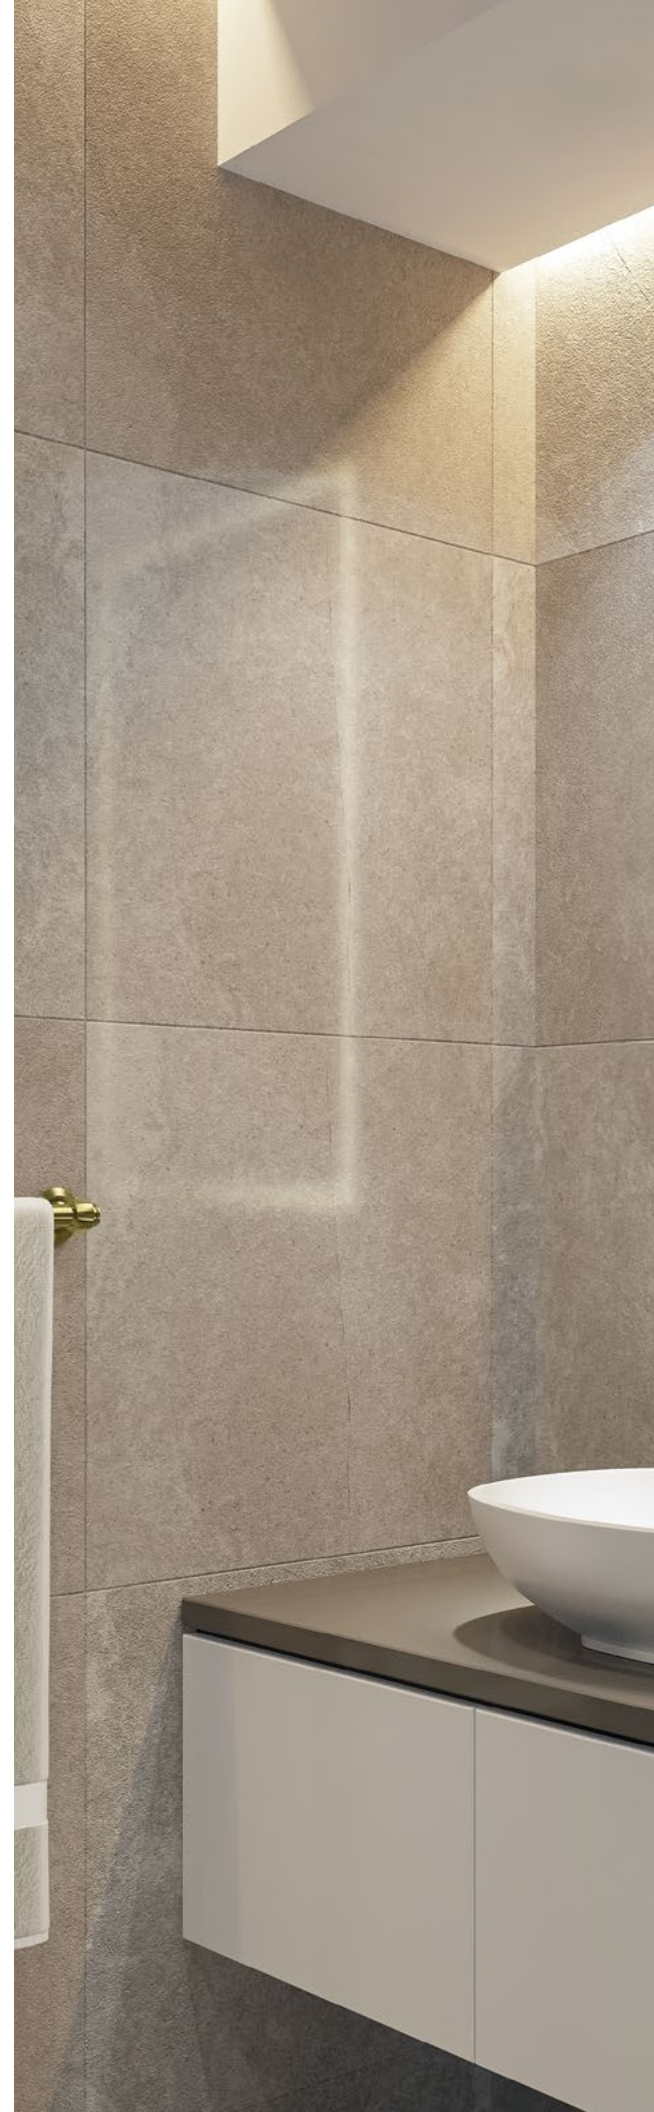

MRISSA MIRROR  
48510-011

# ARTELL

A beveled mirror surface is paired with integrated backlighting, creating a controlled halo effect around the frame. Reflection and illumination work together to enhance depth while maintaining clarity. Artell is defined by precision and simplicity, balancing function with refined detail.

Visit [eurofase.com](https://eurofase.com) to view the entire Artell Collection.

ARTELL MIRROR  
48974-011

# STERNN

A luminous glass cylinder is set against a minimal backplate, allowing material contrast to define the composition. Textured glass softens illumination while maintaining depth, creating a consistent and controlled glow. Sternn is sculptural, restrained, and quietly expressive.

Visit [eurofase.com](https://www.eurofase.com) to view the entire Sternn Collection.

STERNN OUTDOOR WALL SCENCE

50272-013

# FLORIN

A cylindrical glass core is framed within a structured outline, defined by proportion and restraint. Diffused illumination settles into a soft, consistent glow, creating a sense of quiet stability. Across multiple applications, Florin maintains a cohesive and understated presence.

Visit [eurofase.com](https://www.eurofase.com) to view the entire Florin Collection.

# EF SERIES

High-output heating is delivered through a refined, architectural form. Designed for larger exterior environments, the system provides consistent, wide-range coverage while maintaining a clean visual profile. Performance and design are balanced to support comfort without visual disruption.
